

Scorekeeper

The job is to enter the data from the scribe sheets into the Agility Rocks Software on the computer. This job must be done by someone who has been trained on, or has experience with, Agility Rocks.

The scorekeeper sits outside the ring, behind the scribe. The scribes puts completed scribe sheets into a bin. The scorekeeper takes the scribe sheets out of the bin and enters the data on them into Agility Rocks.

At the end of each event, the scorekeeper works with the Trials Secretary to print and post the results of the completed event.
